MMDWFCART

BWT MAGNESIUM MINERALISER IN - LINE WATER FILTER CARTRIDGE

BWT Magnesium Mineraliser Water Filter Cartridge

The MMDWFCART is an in-line water filter cartridge designed to be used with the DWFKIT and MMDWFKIT drinking water filter kit, to reduce chlorine, unpleasant taste & odour and scale whilst enhancing the filtered water with Magnesium.

SPECIFICATIONS

Nominal flow rate:	Approx 4 Litres/min
Filter capacity:	Approx 1500 litres (at flow rate of 4 Litres/min)
Recommended change out differential pressure:	1bar
Max water temp:	45°C
Diameter:	55mm
Height:	260mm
Media:	Granular Activated Carbon & Resin

MMDWFCART

The differential pressure will increase the longer the cartridge is in service. The rate of that increase will depend on the quality of the incoming water.

Changing the filter cartridge
It is recommended that cartridges be changed at least every 3 to 6 months, or sooner if the quality or flow of the water falls below a reasonable level for your intended use, or if the differential pressure across the cartridge reaches 1 bar.

Please note: When first installing the cartridge it is good practice to run the tap for several minutes to flush through the media and remove any fine particles etc. left over from the manufacturing process.

Important Note: ***Water supplies should always be verified as safe to drink by competent and qualified person(s)***
