

The Perfect way to enjoy
Magnesium Mineralized
Water at home sustainably

Own your own cooler ...

... buy water when you need it

6 steps to bottled water at home without the plastic waste:

- Step 1. Order online at bwtshop.co.uk - 3 x 11 litre bottles and 1 x slim cooler.
- Step 2. We will call you to arrange delivery and explain how our water replenishment plan works.
- Step 3. We will then deliver your 3 x 11 litre bottles and 1 x slim cooler to your home.
- Step 4. We will contact you usually once a month to see if you need more water.
- Step 5. If you do need water on our first visit, we will deliver 3 X full and take away 2 because you may still have one bottle on your cooler.
- Step 6. On subsequent visits we will deliver 3 x full and take away 3 x empties. Bottles are then cleaned sterilized and refilled so no plastic is wasted.

NOTE: We recommend that you sanitise your new water dispenser at least every three months. You can add a Sanitisation Pack to your regular water order at any time. Please talk to us when we call.

- All bottles are reused.
- Friendly pre-calling service, means you always have the water you need.
- We collect your old bottles whilst delivering new ones.
- Computerised journey planning ensures you have water when you need it and reduces unnecessary food miles and emissions.
- To optimise our deliveries, we simply ask you to order at least 3 bottles at any one time.
